Care Manager Assistant

Some of the main comments and concerns in engagement before the workshop

'I haven't got time'

'What's in it for me'?

Is this a down sizing exercise'?

'Why should I tell you what I do in the community'?

Some of the main comments and concerns after the workshop

There wont be enough time to complete this work.

Is this a six month wonder.

How will we know if it is going to make a difference down the line.

Some of the main comments and concerns after the workshop

Really good to share our experiences of work with others and discuss differences and similarities.

We do so much that people and managers don't know about.

Its good to see someone is interested in what we really do rather than what we achieve.

Some of the main comments and concerns after the workshop

- If it helps managers, the public and commissioners understand what we do then its worth trying it.
